

## Unit 8

Instructions: Use the following answers for the questions below:

- A. Corticosteroid
- B. Cyclophosphamide
- C. Cyclosporin A
- D. Rapamycin
- E. C and D

- 1. Anti-inflammatory
- 2. Prednisone
- 3. Cytotoxic drug
- 4. Interfere with T cell signaling

Instructions: Use the following answers for the questions below:

- A. Anti CD-40 ligand
- B. Anti-CD4
- C. Anti CD3
- D. Anti-TNF-alpha
  
- 5. Anti-inflammatory
- 6. Used with immunosuppressive drugs to deplete all T cells
- 7. Blocks dendritic cell interaction with helper T cells
- 8. Used at the time of transplantation, favors TH2 response rather than TH1

Unit 8

The Saylor Foundation

Instructions: Use the following answers for the questions below:

- A. Low immunogenicity
- B. Antigenic modulation
- C. Tumor induce immune suppression
- D. All of the above

- 9. how tumors escape destruction by the immune system
- 10. low numbers of MHC molecules on tumor cell surface
- 11. loss of antigen due to antigenic variation
- 12. TGF-beta

Instructions: Use the following answers for the questions below:

- A. Attenuated organism
- B. Conjugate vaccine
- C. Acellular vaccine
- D. Adjuvant

- 13. *Haemophilus influenza* vaccine
- 14. Aluminum salts
- 15. *Bordetella pertussis*
- 16. Flu-mist
